VOL. XXXIV, No. 23

DIDSBURY, ALBERTA, THURSDAY, JUNE 10, 1937

\$2.00 per Year. 5 Cents a Copy

## E. L. Gray Named Liberal Leader

E. L. Gray, Brooks, manager of the Eastern Irrigation District since its inception, is the new leader of the Alberta Liberal party.

A graduate of Guelph College of Agriculture, the man who in 1927 joined the Alberta civil service to later become field crops commissioner and then deputy minister of municipal affairs, was ushered into office late Friday afternoon to a rousing salute which echoed to the corners of the spacious Victoria Pavilion in Calgary. The election was unanimous from a field which originally included seven "possibles."

Born in Gray County, Ontario, the new Liberal leader is a man his followers class "a real westerner." As a boy he came west with his parents, Mr. and Mrs. Samuel Gray, pioneer homesteaders of the Weyburn, Sask., district.

He was educated in the public schools at Regina and Weyburn, and graduated from the Guelph agricultural college in 1924. Following service with the Ontario department of agriculture he came to Alberta, was for three years field crops commissioner, and in 1934 deputy minister of municipal affairs.

Mr. Gray served overseas during the Great War; resigned his post with the Alberta government after the Aberhart administration assumed office in 1935.

## Items of Interest

Robert L. Barrowman, Lethbridge, was elected president of the new Alberta Liberal Association early Saturday afternoon at the annual convention of delegates from federal and provincial constituencies embarked on the last lap of their two-day convention in Calgary.

Sgt. J. A. (Ted) Jensen left Innisfail on Saturday en route to the Bisley ranges in England. For several years Jensen has figured as one of the foremost Canadian marksmen, having taken high honors at Calgary, Toronto and Ottawa rifle meets. About three years ago he won the governor-general's event at Ottawa, and last year topped the Canadian Bisley team. In 1932 Jensen attended Bisley, finishing well up in the running. He expects to return in August.

## Will Discuss Larger School Units

With a view to the establishing of a Large Unit, following lines of modern school administration in the British Isles and in Canada, meetings will be held at nine centres covering eighty school districts.

These centres are: Didsbury, Olds, Sundre, Harmattan, Cremona, Crossfield, Madden, Carstairs, Maydon.

The purpose of the meetings will be to clarify details connected with the larger units.

Eleven units have been organized within the province, and it is proposed to extend these north to Red Deer within the year.

Objectives of this form of administration briefly are: Equal opportunities for all of the children of the province, to include such items as Medical Inspection, High School facilities for all, Extended Library facilities, Household Economics, Manual Training, and such other facilities as are now but partially offered, together with adequate supervision.

Town and village schools are not included within the larger units, but all interested may attend.

The Didsbury meeting will be held Monday, June 14th, at 2 p.m. in the Opera House, and a meeting will also be held at the Harmattan Hall, Harmattan, Thursday, June 17th, at 2 p.m.

## People's League Will Hold Meeting

A mass meeting will be held under the auspices of the People's League at the Opera House Wednesday, June 16th, at 8:30 p.m.

The speakers will be H. G. Scott, who was formerly the police magistrate at Calgary and now organizing secretary of the League, and R. C. Drew.

The People's League is a non-partisan association working in the interests of good government for the province.

Questions of interest will be discussed and answered.

## Knox United Church Notes.

Anniversary Services will be held throughout the charge on Sunday, Rev. Sidney Pike of Innisfail has been secured as the special preacher. He will be at all three appointments. In town the choir will render special music and the loose plate offerings will go to the Church Building Fund. We earnestly urge a full attendance and generous contributions. On Monday there will be the Anniversary Supper and program, during which Rev. S. Pike will speak. The proceeds will be devoted to the Church Building Fund. See the advertisement.

## At the Movies.

A splendid line of pictures have been booked by Mr. Sharp for showing at the Didsbury Opera House for the summer season. Following are the bookings for the next few weeks:

June 11-12: "The General Died at Dawn"  
June 18-19: "The Green Light" and Coronation film.  
June 25-26: "Re-Union."  
July 2-3: "Come and Get It"  
July 9-10: "Life Versus Secretary"

## Rosebud Baseball League Reorganized

After a lapse of a couple of years the Rosebud Baseball League was reorganized at a meeting held at Olds on Tuesday evening. Four teams, Didsbury, Olds, Carstairs and Bowden, were entered and they will play two rounds of home and home games.

Phil Weber, Carstairs, was elected president and Harold Smith, Olds secretary-treasurer, who together with two members of each club will form the executive. Dr. Hartman, Olds, was elected hon. president.

Following schedule was drawn:

June 11: Olds at Bowden  
Carstairs at Didsbury  
" 15: Bowden at Olds  
Didsbury at Carstairs  
" 18: Olds at Carstairs  
Didsbury at Bowden  
" 22: Carstairs at Olds  
Bowden at Didsbury  
" 25: Didsbury at Olds  
Carstairs at Bowden  
" 29: Bowden at Carstairs  
Olds at Didsbury  
July 6: Bowden at Olds  
Didsbury at Carstairs  
" 9: Olds at Bowden  
Carstairs at Didsbury  
" 13: Carstairs at Olds  
Bowden at Didsbury  
" 16: Olds at Carstairs  
Didsbury at Bowden  
" 20: Olds at Didsbury  
Bowden at Carstairs

## Catch Black Gophers; Send to Calgary Zoo

Black Gophers are somewhat of an oddity, but a pair of them was caught by Joe Dyck and Harvey Hosegood last Wednesday evening.

They noticed them about 2 miles south on the highway when they were taking a truckload of cattle to Calgary. On their return, they managed to snare the pair with fish line.

After exhibiting them around town, the gophers were taken to the Calgary Zoo. The officials of the Zoo said that they were the first black gophers they had seen. As the gophers were male and female it will be interesting to see if their offspring still retain the black color.

Mr. F. Sissons, of Clive, Alta. visited with his daughter, Mrs. Harvey Hosegood on Tuesday.

## Legislature Again Adjourns till Monday.

After short sessions on Monday and Tuesday, the Alberta Legislature adjourned until Monday, June 14th.

Premier Aberhart stated in the house that the government could not proceed with legislative business until the return of George MacLachlan, M.L.A., accompanied by G. F. Powell, social credit expert.

## GOLF NOTES.

Eight members of the Didsbury Club went to Carstairs on Sunday and played an eighteen hole competition with members of the Carstairs club. When the cards were counted Didsbury were the losers by 11 points.

All the greens have been newly oiled and sanded this week and the course is reported to be in excellent condition.

Both the ladies' and gent's competitions are now in progress and the final date has been extended to Sunday, June 13th.

## BASEBALL.

Baseball was revived at Didsbury Thursday night when the reorganized Carstairs and Didsbury teams turned in a neat seven inning performance, Carstairs blanking the locals 3-0. Stellar pitching featured the game with Campbell earning his shutout. George Geiger blanked Carstairs for five innings when a scratch hit, a single and two errors gave the visitors two runs. Alf Durrer finished the game for Didsbury and gave plenty of promise. Both teams fielded a wealth of good material and with a few more games under their belts the boys will provide a really interesting class of ball.

**Batteries**  
Carstairs: Campbell and Higgins.  
Didsbury: Geiger, Durrer and Wyman.  
Umpire: Donnelly, Carstairs.

Saturday evening Didsbury took their revenge on Lone Pine by beating them by a score of 6-2. The game was well contested and both teams gave a good account of themselves in the field, but Didsbury's hitting proved too much for the visitors.

Stouffer, pitching for Didsbury and Idris Jenkins for Lone Pine opened the game, but were replaced later by George Gaiger and Bob Eckel.

Umpire: Norman McLeod.  
These teams met on the Sunday previous at Lone Pine when Didsbury took the short end of a 16-3 score.

## Didsbury Fish and Game Association Annual Meeting

The work of the Fish & Game Association was reviewed at the annual meeting held last Thursday evening and the officers for the year were elected. Each committee gave their report, showing the work accomplished during the year.

The fish committee reported that they were successful in having 20,000 Eastern Brook fry placed in the Fallen Timber Creek last summer, and a resolution was passed that the department be asked to place another 20,000 fry in the creek this year. It was also reported that the planting of Loch Leven trout during the last few years in the Raven River had been very successful, with the result that now there was very good fishing in that stream.

Ken McCoy reported that a number of traps had been set out for crows and magpies, and while earlier in the season they were not very successful, they were now functioning better, and he was instructed to press his activities in the extermination of these pests.

Correspondence was read regarding the possible pollution of the Big Red by the Hunter Valley Well. Officials of the well gave assurance that every possible effort would be made to prevent oil getting into the river. Other correspondence asked for support in having all trout streams cleared of pike and suckers.

A resolution was endorsed asking the provincial government to install fish hatcheries and raising ponds.

Officers were elected as follows: C. H. Adshad, president; C. E. Reiber, vice-president; J. E. Gooder, secretary-treasurer. Membership committee, Ken McCoy, C. R. Ford, E. Watkin, C. H. Adshad; committee on big game, Ken McCoy, J. Topley, A. G. Studer; committee on game birds, E. Watkin, Jim Caithness, J. A. McGhee, W. H. Davies, J. H. Hosegood; committee on fish, C. E. Reiber, T. Johnson, J. S. McCloy, C. S. Mortimer, J. A. McGhee.

## Preservation Of Democracy

In these days of international strife and internal controversy, with protagonists of Fascism and Communism in the saddle in some countries and advocates of these and other isms striving to get the upper hand in other realms, the people of Western Canada have every reason to be thankful that they are citizens of a country where democracy reigns—a country in which the people themselves have the right to say what they want and in which the precious privileges of free speech and a free press still prevail.

Fears are frequently being expressed, however, that democratic countries are in danger of being overwhelmed by the fighting forces of dictator-ruled countries and that democracy is in peril of extinction. No doubt, there have been some grounds for such fears, but to-day the greatest danger to self-government comes from within rather than without.

It can be taken for granted that the great bulk of the people of this country are not prepared to surrender their liberties to any form of dictatorship, whether group or individual. The rights of free speech and freedom of action are cherished and there are few who would relinquish them in favor of benefits, imaginary or real, which would result from abandonment of the self-governing privilege.

But if these rights and privileges are to be conserved, it is essential that the standard of education of the people be high and that they be of strong moral fibre, for in a democracy it is a sine qua non that the leaders of government must possess these attributes in high degree and it is also a fact that in these respects the leaders cannot be far in advance of the electorate who give them their authority or they will not be in office very long. So that in the final analysis the type of government that the people of a democracy get depends upon themselves and is no higher than they deserve. Hence, the importance of an enlightened, intelligent and unselfish electorate if democracy is to be preserved in an age of conflict between principles and desires.

This thought is very ably expressed by James Truslow Adams in the New York Times Magazine as summarized by the Reader's Digest in the following words:

"Just as a despot may be benevolent or cruel, so a people which governs may be educated, wise, public spirited or the reverse" and, amplifying this idea:

"Both democracy and the vision of a very high standard of material living for all are new. Man is by nature selfish. He looks first to the good of himself, his family and his group or class, rather than to that of all. Pressure groups arise. If such groups learn, as they have done, to use the machinery of democratic government more rapidly than they develop the social and moral spirit, that can alone sustain democracy, it is far from unlikely that they may destroy the finances of the State, pull down the entire structure, and in the resulting chaos and distress be willing to give up the dangerous and difficult adventure of self-government to any man who will promise a false security."

"There is also the race, which may be lost, between education and the increasingly complex demands on government. Few, if any, are the citizens, with their own affairs to look after, who can hold really competent opinions on such diverse topics as, say, money, price regulation, labor, agriculture, foreign affairs. In so far as a pure democracy tends to make rubber stamps of its representatives and to play on their fears for favors demanded, it will tend to make costly and perhaps fatal mistakes."

After exploding the theory that democratic government is more inefficient than a dictatorship, Mr. Adams goes on to say:

"On the other hand, the condition—material and spiritual—of the peoples to-day under a Mussolini, a Hitler or a Stalin does not indicate that the wisdom of one promises better conditions for all than the folly of the many. In what totalitarian State," he asks, "are the all-round conditions for a contented, wholesome, free and full life better than they are in the Scandinavian countries, the British Empire and the United States?"

"There are, however, these and other insidious mental and moral problems for democracies as for individuals. A man who does not bother to educate himself, who wants only easy money regardless of the consequences to others, who declines to work if he can be supported by somebody else, who thinks he has a right to all he wants, who thinks only of claims and not of duties, and so on, is not likely to be a success. Neither is a democracy made up of such."

### Food Prices Climbing

#### Bureau Of Statistics Reports Increase In Living Costs

The cost of living is climbing. The general index of the cost of living for Canada, computed by the Dominion bureau of statistics, was \$2.2 in April as compared with \$2.0 in March.

The retail price index of foods rose from 75.7 in March to 76.3 in April. Considerable gains were reported for a wide range of foods, including butter, lard, flour, bread, sugar, tea, codfish and several meats, although moderate decreases occurred for eggs, corn, potatoes, marmalade, jam and coffee. There were no changes of any importance reported for other budgetary groups.

The cathedral at Toledo, Spain, has a sacramental shrine 12 feet high embellished with 260 statues of solid gold. The largest of these was made from the gold which Columbus took to Spain after his first voyage of discovery.

### One Of Britain's Heaviest

#### Man Twenty-Four Years Old Weighs 448 Pounds

When Herbert Savage, of Rochester, England, who weighs 448 pounds, fell and broke his ankle, six men sent from the hospital had a hard time lifting him into an ambulance. At the hospital he was given for his first meal a boiled egg and two slices of bread and butter, the regular diet. His girth is nearly 80 inches. He wears a collar about two feet in length. For his age, 24, he is one of the heaviest men in Great Britain. Last year Richard Harrow, who weighed 560 pounds and was known as "the quarter-a-ton man" died at Southend.

### According To Leopard Law

Three new-born leopard cubs were killed by their mother in Lincoln Park Zoo, Chicago. Attendants attributed the infanticide to an inexorable law of leopards—never to let their young be reared in captivity.

### New Scientific Finds

#### Were Discussed At Annual Meeting Of Virginia Academy

A new type of high speed rotor which spins freely in space, Dr. Fred T. Holmes of the University of Virginia said, may provide a new tool for medical research and studies of such fundamental things as the speed of light.

Addressing the annual meeting at Charlottesville of the Virginia Academy of Sciences, he described how for the first time it is possible to suspend the tiny top between two magnets which just overcome the pull of gravity.

Chemical houses made largely of the new products of organic chemistry were predicted by Dr. G. C. Curme, vice-president and director of research of the Carbide and Carbon Chemicals Corporation.

At present, Dr. F. B. Jewett, president of the Bell Telephone laboratories, explained, the telephone voice has had to pass over an actual, physical circuit, that is, a pair of wires.

"Recently, however," he said, "thanks to the research laboratory, operating in a myriad of fields, an entirely different method of providing large numbers of channels has been achieved and the way opened to an unknown indefinite extension."

### Lady Shaughnessy Dies

#### Was Widow Of One Of The Founders Of The Canadian Pacific Railway

Dowager Lady Shaughnessy, widow of Rt. Hon. Lord Thomas George Shaughnessy, one of the founders of the Canadian Pacific Railway Company, died in Montreal after a brief illness. She was in her 85th year.

Lady Shaughnessy, whose husband died in December, 1923, had been ill only four days. A daughter of N. Nagle, of Milwaukee, Wis., she was married in 1880 to the Irish railway pioneer, who received a knighthood from King Edward in 1901.

For many years Lady Shaughnessy was active in social and charitable work, but since her husband's death had lived in retirement at her big Peel street residence.

Survivors include a son, Lord Shaughnessy, visiting in London with his daughter, and two daughters, the Hon. Marguerite Shaughnessy and Hon. Mrs. R. M. Redmond.

### SELECTED RECIPES

#### CHOCOLATE SOUFFLE

Temperature: 325 degrees F.

Time: 45 minutes.

2 squares unsweetened chocolate

1/2 cup sugar

3 eggs

2 tablespoons butter

1 tablespoon Benson's Corn Starch

3/4 cup milk

1/2 teaspoon vanilla

Method: Melt chocolate in top of double boiler; add 1/4 cup sugar and beaten egg yolks. Stir and cook until smooth. Melt butter; blend in Benson's Corn Starch and let bubble 2 or 3 minutes. Add cold milk; stir and cook until sauce is smooth. Combine two mixtures and let stand until at room temperature. Stiffly beat the egg whites adding reserved 1/4 cup sugar. Fold into the chocolate mixture. Add vanilla. Sift Benson's Corn Starch over the bottom of an ungreased casserole; pour in soufflé mixture. Bake in slow oven until light and delicately browned. Serve at once with "Crown Brand" sauce.

### New Organ In Abbey

#### Installed At Cost Of Around Hundred Thousand Dollars

Radio fans who listened to the broadcast of the coronation of King George and Queen Elizabeth, May 12, enjoyed a much better musical program than the actual participants did at the time of King George V's coronation in 1911. Installation of a new hundred thousand dollar organ in the Abbey enabled the authorities to draw up a much more comprehensive musical program than at the last coronation.

The old Abbey organ, built 206 years, completely collapsed early last year.

"You never take the slightest interest in anything I do," sobbed the young bride.

"Now don't be unreasonable darling," said the new husband. "All last night I lay awake wondering what you had put in that cake you made yesterday."

### Seed Growers To Convene

#### Canadian Seed Growers' Association Meeting At University In Saskatoon June 24th To 26th

On the morning of Thursday, June 24th next, the annual meeting of the Canadian Seed Growers' Association will be convened at the University of Saskatchewan, Saskatoon, Sask. The party will be welcomed to the University by President W. C. Murray, and a three day session of business and entertainment will follow. Residence accommodation is being provided in the University at very reasonable rates.

F. W. TOWNLEY-SMITH  
President

The Hon. J. G. Taggart, Minister of Agriculture for Saskatchewan, will be present and will address the gathering.

The subjects to be discussed at the meeting will include the new rust resistant wheats, the treatment and control of plant diseases which affect the cereal grains, and other questions bearing on the work of the C.S.G.A. Prominent speakers are being invited to give addresses and lead in the discussions.

Several years ago a branch of the Canadian Seed Growers' Association was organized in Saskatchewan, and the officers of this branch, together with local committees appointed for the purpose, are sparing no effort to arrange an interesting, instructive and enjoyable time for those who can attend the meetings. All those in-

F. L. DICKINSON  
Vice-President

### Farm Machinery Business

#### Staging A Comeback In Western Canada After Many Years

After seven lean years, the farm implement business is picking up in Western Canada.

The prairie farmer is once again in the market and making long-overdue replacement of farm machinery, implement company officials at Winnipeg said.

One major company reported 50 per cent. increase in sales in the first four months of this year compared with the same period last year. Other companies also reported considerable increases.

Prevailing high prices for wheat and optimistic crop conditions in Manitoba and parts of Saskatchewan and Alberta have led to the buying wave, it was stated.

The implement business has been in a slump since 1929 and for the past seven years farmers' demand for farm machinery in Western Canada has dwindled in face of poor grain prices, drought and general economic instability.

The common house spider has six spinnerets, each of which is covered with tiny spinning spools, and out of these come jets of liquid silk, hardening instantaneously on exposure to air.

## HIS RHEUMATISM LEFT HIM

### Sufferer Follows Good Advice —and Takes Kruschen

The writer of the following letter had a bad attack of rheumatism, and was advised to take Kruschen. He did so, and describes his experiences in the following words:—

"About two years ago I developed a severe attack of rheumatism in my left shoulder blade. I tried all sorts of remedies, but with no results, until one day my brother-in-law, on hearing of my suffering, exclaimed, 'There is only one thing for rheumatism! That is—Kruschen Salts!' I decided to purchase a bottle, and for the first week took a teaspoonful in a glass of hot water each morning. The pain gradually disappeared and has now gone entirely. I am still taking my early morning dose, as I feel convinced that it is helping to keep me fit."—J.G.B.

Rheumatic conditions are frequently the result of an excess of uric acid in the body. Two of the ingredients of Kruschen Salts are notable for their work in dissolving uric acid. Other ingredients of these Salts assist Nature to expel the dissolved acid from the system.

Interested in the use of pure variety seed will receive a hearty welcome to the University.

The entertainment part of the program will include visits to points of interest in the neighborhood of Saskatoon, and the farms of certain seed

W. T. G. WIENER  
Secretary-Treasurer

growers nearby. It is expected that automobile trips will be made to the Dominion Experimental Station at Rosthern and to the farm of James Rugg of Elstow that will have special interest for farmers, and a holiday trip to Lake Manitou at Watrous is also being planned for June 26th. Ladies can participate in all the events and a special program is also being arranged for them.

Mr. F. W. Townley-Smith, Lashburn, Sask., is the president of the Canadian Seed Growers' Association; Mr. F. L. Dickinson of the United Grain Growers Limited, Winnipeg, Man., is the vice-president, and Mr. W. T. G. Wiener, Ottawa, Ont., is secretary-treasurer. The head offices of the association are located at Ottawa, Ont.

For any information concerning this meeting write to S. H. Vigor, Secretary, Sask. Branch, Canadian Seed Growers' Association, Room 146, Parliament Buildings, Regina, Sask.

### Zinc Added To Insulin

#### Tends To Slow Down Its Action In Body

Sir Frederick Banting of the University of Toronto, discoverer of insulin as a remedy for diabetes, told scientists at Pittsburgh, for dedication of Mellon Institute's new building, that zinc is being added to insulin to slow down its action.

Sir Frederick explained pure insulin is too quickly absorbed by the body, necessitating, in some cases, several doses daily.

The zinc treatment, he said, slows the action, but added:

"It is too early to speak of the clinical value of this form of insulin."

Asked if he could vision a world free of disease, Sir Frederick replied:

"Free of infectious diseases, yes. But as we conquer them new diseases of an organic nature come to light. Heart trouble, for instance, and many others brought on by our complex civilization."

"Empress," an Indian elephant, served on both sides during the Civil War. Both the South and the north used her for hauling supplies at Nashville, Tenn.

The Franciscan monks own the garden of Gethsemane.

## Empire Search For Raw Materials Is A Highlight Of Britain's Defence Program

Empire search for important raw materials is a highlight of Britain's defence program which has called upon private industry to line up behind the government in shipyard, machine shop and construction camp.

The idea is to guarantee a source of supply, expedite the program and guard against an industrial slump after the rush period is over.

Faced with the problem of locating a convenient spot within the empire for the accumulating of large oil reserves, Sir John Cadman, commissioned by the government, concentrated on Trinidad as a focal point of the proposed oil defence plan.

Situated at the heart of the empire, within comparatively easy access of the British Isles and the Dominions, the island off the coast of Venezuela produces large quantities of oil, has modern refineries, pipelines and organized transport.

It has been pointed out that while British finance controlled some of the largest oil undertakings in the world, the projects were for the greater part in countries outside the empire. With a shortage of iron and steel threatening to hold up armament manufacture, one section of the English press has called for further reduction of import duties on pig iron and semi-finished steel. It has been suggested the next report of the import duties committee may recommend government control of the industry in the interest of the country and to counteract the European steel cartel and prohibitive duties on imports from other countries.

On the Clyde \$175,000,000 worth of naval tonnage is under construction or contemplated. It is possible workers may have to be recruited from Belfast to cope with the situation. Work on some private contracts has gone begging with the exception of the sister ship of the Queen Mary on which considerable progress has been made.

Another suggestion affects the building industry. It has been reported the government may ask local authorities to slow down their housing programs and give priority to new airdrome construction throughout the country. This, it is claimed, would also distribute employment over a longer period, and avoid a slump.

Meanwhile the Building Industries National Council has offered to assist the government with information on the available resources of labor and material; of the extent to which productive capacity can be rapidly increased if necessary, and organization and planning of large-scale building works.

### A Western Film

#### Scenic Setting To Be In Prince Albert National Park

The Prince Albert National Park will become more than a vacation resort for tired business men and pretty surf bathers this summer. It will be the location for a movie unit and among those to be present will be Gary Cooper and Jean Arthur, the "Deeds" headliners, according to a report received. The two stars will appear in a film tentatively titled "Timber" to be produced in the park during the summer.

Already on the way to the park are M-G-M cameraman Bob Lightner and a party of assistants. They will be followed later by others, including Cooper and Miss Arthur to swell the total number to 50. The stars are expected to arrive in June. In the meantime, however, filming of certain background shots will take place.

Lightner is expected to find snow in the park and has announced he may have to go farther north for the snow or wait until it arrives again.

Among those to arrive first will be Phyllis Gordon Demarest, film writer, and her mother, Mrs. Estelle Demarest, Saskatoon Star-Phoenix.

Photographs taken in 1897 on the ill-fated Andree expedition to the polar regions were not developed until 1930.

Canada's 1935 exports of fish were valued at a total of \$24,435,000.

### Uses Of Coconut Palm

#### Ceylon Has Issued Report On Products Made From Tree

Ceylon has 20,000,000 coconut palms, and also a coconut research group which has just issued a report on the innumerable uses to which this Pooh-Bah among trees is being put. The natives eat the white meat of the nuts and drink the milk in them. The meat is desiccated for decorating cakes or dosing unwell dogs. It is dried to make copra, which yields coconut oil used in soap, margarine and candles. The shell is used in theatres to imitate the clatter of horses' hoofs or turned into charcoal and used in making gas masks.

The fibre goes into ropes, brushes, doormats, carpets and upholstery. The leaves make fans, baskets, brooms, thatch and Ceylonese lobster-traps. The trunk yields fuel and the timber known in commerce as "porcupine wood", useful alike for building and for the making of carved knick-knacks. The roots are boiled to make a kind of coffee or roasted and ground to make tooth powder. The young bud is the tasty vegetable "palm cabbage". The juice of the unopened flower makes a toddy which can be boiled down to sugar or distilled into a potent arrack. An arboreal Pooh-Bah, indeed. —New York Times.

### Sells Canadian Products

#### Intensive Advertising Campaign In United Kingdom Is Success

During the past few months the federal government has been conducting, in certain centres in the United Kingdom, an intensive "Canada Calling" campaign, forcibly drawing the attention of consumers to the variety and merits of the Canadian food products available for their use. As a result in some instances the sale of Canadian produce in the week in which the campaign was launched in their areas increased by from 20 to 100 per cent. in comparison with the corresponding week of the previous year. The largest wholesale organization in Scotland, for example, with hundreds of retail outlets, reported an increase of 163 per cent. in the sale of salmon. Although the campaign will not terminate until the end of the year, it is already being reported from the United Kingdom that supplies of certain Canadian products, particularly hams, canned milk, canned vegetables and canned lobster are inadequate as compared with supplies of similar foreign articles. Uniformity of quality and continuity of supplies are essential. —Brandon Sun.

### In Days Of Old

#### When King Henry VII. Had His English Mastiffs Hanged As Traitors

No account of the infliction of capital punishment on animals is complete without mention of King Henry VII. of England and his remarkable manner of governing not only his famous private menagerie but his British realm as well. He carried his notions of the royal prerogative so far, we are told by Miss Strickland in her "Lives of the Queens of England," that he had four English mastiffs hanged as traitors because they overcame one of his lions with whom they were set to fight.

It also appears that he "put to death one of his best falcons, because it feared not to match with an eagle, ordering his falconer, in his presence, to pluck off the gallant bird's head, saying, "It was not meet for any subject to offer such wrong unto his lord and superior!"

But these "were symbolical executions" and "were meant as significant hints to Henry VII.'s turbulent nobility." —New York Sun.

### Motorist Gate Is New

Two farmers in Wellington, New Zealand, have invented a "motorist gate." As a car approaches the "barrier," the gate lies down gracefully. When the car is through the gate and passes over a second device the gate rises and slides into its place again. 2593

### Poultry Outlook Favorable

#### English Market Would Take All Canada Can Send

Possibility of an egg shortage next fall is causing real concern. The impression now is that eggs will be scarce from September to January and that poultrymen will do well to get their birds in lay at that time. Some authorities are advising producers to raise every chick that they can this spring. While the cost of feed is rather high, prices of all commodities are rising and it is reasonable to expect that when conditions adjust themselves eggs and poultry will also be higher.

The egg market at Eastern centres is now two to three cents above the corresponding period of a year ago, and, with some recent reductions in feed prices, the prices of eggs and feed are coming more in line with each other.

While the outlook for poultry is not yet as critical as that for eggs, there is reason to believe that with the higher prices prevailing for other classes of meats, the outlook for poultry, particularly chickens, is very favorable. Canada has just experienced the largest period of export of poultry in many years. Industrial employment and the general industrial condition in England are at a high peak and when times are good, poultry is in demand. In order to meet that demand, chicks must be hatched and raised and England is looking to Canada for more market poultry. High feed prices are not peculiar to Canada. It is a situation that affects every country, the poultrymen in England even more so than the poultrymen in North America, so that Canada's prospects in a competitive way in market poultry should be even brighter in 1937 than they were in 1936.

Typical of the improving quality of Canadian chickens going to Great Britain is the fact that one car going for export recently contained all milkfed birds, 350 boxes of Milkfed A and 150 boxes of Milkfed B.

### This Is Unusual

#### Woman Married Twice Has Not Changed Her Name

A married woman never has changed her name although she was married twice. She is Mrs. Barker, a widow, of Leek, Staffordshire. When she left the church the second time her name was still Mrs. Barker. The bridegroom was her late husband's brother. Her surname has always been the same for she was a Miss Barker before her first marriage.

### Old Ash Dump Useful

At Coalhurst, Alta., an old colliery ash dump which has been smouldering for 20 years is supplying road-building material. Hundreds of tons of ash are being spread on the highway between Coalhurst and Kipp. Even after being dumped on the road steam and smoke are noticeable for a time.

It's a good thing to give credit where credit is due, but it's better to get paid in cash.

## A Proposed Merger Of Western Provinces To Lower Government Cost

### The Search For Truth

#### World's Largest Research Institution Dedicated At Pittsburgh

Mellon Institute, Pittsburgh, dedicated its \$6,000,000 new building, the world's largest research institution, its exterior a Greek temple nine stories high, its interior new laboratory magic.

It has 3½ miles of corridors leading to 322 laboratory rooms where at present 185 scientists work.

In the new laboratories the scientist can get the temperature of tropics or Arctic, or the climate of the Sahara for his experiments simply by turning a thermostat.

If he wants a vacuum resembling that on the surface of the moon he can get it out of a pipe in any laboratory. Other pipes will give him steam, gas, hot or distilled water.

Shelves hook into the walls. Ten minutes is enough to change the shelf arrangement of an entire room.

In this magnificent temple the scientific workers receive an average pay of \$4,000 a year. These men and the 777 scientists who have preceded them since the institute was founded in 1911, have by their discoveries, established ten new American industries, aided about 4,000 American companies, invented about 650 novel processes and products and been granted 669 United States patents.

The dedication was in honor of Andrew W. Mellon and the late Richard M. Mellon, founders of the institute. They set it up as "an independent non-profit scientific institution whose sole aim would be the search for truth."

### Best Friend

#### Britain Most Liked European Nation By The American People

A recent nation-wide poll conducted by the Institute of Public Opinion, marking the twentieth anniversary of the United States entrance into the World War, indicates that Great Britain is the most liked European nation among the American people by a wide margin.

Great Britain heads the poll with a 55 per cent. vote, with France second and Germany third. The vote in favor of Great Britain was five times greater than accorded France and almost seven times greater than for Germany. The vote by percentages was as follows:

Britain 55, France 11, Germany 8, Finland 4, Ireland 4, Italy 3, Switzerland 3, Belgium 2, Norway 2, Sweden 2, Denmark 1, Greece 1, Holland 1, U.S.S.R. (Russia) 1, all others 2.

Statistics show that animated cartoons are more in demand in other Occidental countries than in the United States. These cartoons now are made in French, Spanish, Italian and German.

When the proposal for the annexation of the Yukon territories to the province of British Columbia comes before the next session of the Federal Parliament, it is likely that one of the grounds upon which the federal government will defend it will be as a first step in the direction of a more logical regrouping of existing local governments west of the Great Lakes.

The stand will be taken by the King government that, geographically, the Yukon belongs naturally to British Columbia. And the suggestion will probably be made at the same time that, ultimately, Alberta should also merge with the Pacific coast province to form one integral economic unit devoted principally to mining, livestock, lumbering, and fruit growing.

Then, still applying the principle of geographic logic, the Ministry will likely propose that Manitoba and Saskatchewan, the two great prairie, wheat-growing, provinces should concern a merger in the interests of reducing the governmental overhead which the people of the West have been finding so burdensome.

Such an ultimate regrouping of western local governments, with lower costs and greater solvency resulting, is the undoubted hope of those on Parliament Hill who for the past several years have been wrestling with the problem of western provincial solvency.

At the same time, it is believed that the real motive for the start now being made with the Yukon and British Columbia lies in the political exigency facing Hon. Duff Pattullo, British Columbia premier. Despite the fact that the Yukon, from a revenue standpoint, has been a losing proposition for the Dominion to the tune of upward of \$300,000 annually, there is said to be a strong sentiment in British Columbia for its annexation.

The reason lies largely in the belief that if the mineral resources of the Yukon territory were opened up by a road running up through British Columbia from Vancouver, they would afford employment and opportunity for thousands of B.C. men and youths who now are idle. Hitherto the province has never been able to enlist the co-operation of the Federal Government for the construction of such a highway. The belief is that, with the federal promise to annex the Yukon to British Columbia, Premier Pattullo will pledge himself, in the election campaign now pending, to construct this highway as a provincial undertaking if returned to power. —Financial Post.

### A Valuable Industry

#### Fisheries In Canada Employ Many Thousands Of Workers

Canada's fisheries provided employment for more than 85,000 workers during 1935, the last year for which figures are available. Of the total, more than 70,000 were men who worked in the "primary operations" of the industry, catching and landing the fish and shellfish. The remaining fifteen thousand or so, most of them men but some of them women, were employed in the canning and curing plants such as the salmon and lobster and sardine factories and the plants processing dried and pickled fish.

Although British Columbia tops all provinces in annual marketed value of fisheries production, more people are employed in the Atlantic Coast fisheries than in like work anywhere else in the Dominion. Fishing conditions on the Pacific Coast are different from those which are found in the Atlantic areas and conditions in the inland fisheries differ again from those in the sea fisheries either east or west. About 56,650 people were employed on the Atlantic Coast, the figure including nearly 2,500 who were at work in the freshwater fisheries of Quebec and New Brunswick, and in British Columbia the personnel slightly exceeded 17,000. The freshwater fisheries outside of New Brunswick and Quebec gave employment to about 8,750 men.

Neither Bolivia nor Paraguay has a seacoast or seaport.

## Here's An Old Time Favorite

Household Arts by Alice Brooks

Let Your Scrap Bag Do The Trick Flower Basket

PATTERN 5848

Like to piece a quilt just like one your mother and grandmother did before you? Here it is—Flower Basket—a very simple one, too! Let your scrap bag do the trick, for it harbors many gay odds and ends of colorful fabric which you can cut in no time into orderly quilt patches. It's up to you, whether different scraps shall be used in each 11 inch block, or the same material, as shown in the sketch. In pattern 5848 you will find the Block Chart, an illustration of the finished block in actual size, showing contrasting fabrics; accurately drawn pattern pieces; an illustration of the entire quilt; three color schemes; step-by-step directions for making the quilt, and exact yardage requirements.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

## The World of Wheat.

By H. G. L. STRANGE

Director "Crop Testing Plan."

The quality of Canadian wheat is in danger!

Such was the fear expressed in 1895 by some who observed how rapidly the production of wheat was expanding throughout the Prairie Provinces, and how so many varieties, some quite inferior, were being brought in and seeded by farmers.

What could be done to assure that the sterling wheat, Red Fife, the veritable foundation of wheat quality, could be kept true-to-variety?

Dr. James W. Robertson, then Dominion Commissioner of Agriculture, set his mind to work. He studied the seed and crop improvement systems of other countries, and finally conceived an idea that he thought might be suitable for Canada.

So in 1899 he put aside a hundred dollars of his own private funds in order to encourage boys and girls on their fathers' farms to pick the best heads of the standing crops of wheat and oats; the heads to be sent to Ottawa. Prizes were awarded for the best collection of true-to-variety heads.

Out of this plan soon came an organization that has steadfastly and continuously, for over thirty years, assisted in maintaining the high quality of Canadian wheat and other grains on world's markets—the Canadian Seed Growers' Association.

Following factors have tended to raise price: Germany again purchasing Australian wheat -- Official Indian wheat estimate reduced by 25 million bushels -- Possibility war again looms in Europe -- Average of U.S. private winter wheat estimates 649 million bushels compared with 652 million a month ago -- Canadian shippers buying back Dutch barley sales.

Following factors have tended to lower price: Indicated increase of 10% in northern hemisphere wheat acreage excluding Russia and China -- France exports wheat to Spain and Germany -- More favorable European weather and crop advances -- Good rains in some parts North America -- World supply of summer oranges plentiful -- Large lemon crop in Sicily.

## Proverbs Revised.

Every picture yells a story.

The darkest hour is just before the dawn.

What the eye doesn't see the foot trips over.

Where singleness is bliss 'tis folly to be wives.

One touch of sunshine makes the whole world skin.

There are none so blind as those who face strong headlights.

## Evangelical Church Notes.

The subject next Sunday morning will be, "The Glorious Gospel," and in the evening the pastor will speak from the subject, "God's Wonder of the Dark."

## Hail Board Will Suspend Operations

Because credit could not be obtained from the banks on the promised guarantee of the provincial government, the Hail Insurance Board of Alberta has been forced to suspend operations this year, it was announced recently by A. H. Tovell, chairman of the board.

The board, which has been in operation since 1919, when it was established by an act of the legislature, will maintain an office and skeleton staff for some months at least.

"It is extremely unfortunate that this had to occur at this particular time," said Mr. Tovell. "There is a better prospect for a crop than for some time and prices are much better than for the past six or seven years."

System of operation was explained by Mr. Tovell as follows:

The farmer who takes out the hail insurance gets the protection on time, the rate being set in the fall after the loss has been ascertained, and the premium becomes a tax against the applicant's land. Money is borrowed through the hail season to pay the claim and costs of administration, and is repaid to the banks as the taxes are collected.

In the past 18 years the board has insured more than 20,000,000 acres, making a risk carried of \$176,000,000. Losses paid have been more than \$15,000,000, and out of every dollar charged in premiums 91 4/5 cents have been returned in claims.

## Survey of Crops and Livestock

In June of each year the Dominion Bureau of Statistics, in co-operation with Provincial Departments of Agriculture, distributes cardboard schedules to farmers for the purpose of collecting statistics of acreages under crop and the numbers of livestock and poultry on farms. An innovation of 1931 extended this survey to cover the breeding and marketing intentions with regard to livestock.

The acreages of field crops, in particular, are the real foundation of our scheme of agricultural production statistics. Only slightly less important in our national planning is the necessity of having correct knowledge of the numbers of livestock on farms. The accuracy of our compilations in both these classes is largely dependent upon the obtaining of completed cards from a fair sample of the total number of Canadian farms.

All farmers are asked to co-operate with the bureau and fill in the information required and mail as promptly as possible.

**Burnside Notes**

Visiting with Mrs. Wm. McCulloch is Mrs. Wall of Didsbury.

Mr. George Metz and son Fred were Sunday visitors with Mr. and Mrs. Levi Storey of Carstairs.

There will be a meeting of rate-payers in Burnside School on Friday evening at 8 o'clock to discuss the question of the larger school unit.

The Didsbury W.I. Constituency Conference will be held Wednesday, July 7th, at the Carstairs East Community Hall.

Messrs. George Metz and Dick Metz, and Misses Salina Dedels and Evelyn Charlton, were Thursday visitors to the southern city.

Messrs. Kenneth and Doug Burns left Saturday morning on a two weeks' vacation trip, visiting friends at Lacombe, Lloydminster and other points.

Mr. Dick Metz had the misfortune to break his collar bone on Sunday morning when he hit a deep rut in the road and was thrown from his bicycle.

Mrs. Wm McCulloch, Mr. and Mrs. Walter McCulloch and daughter, Jessie, were Sunday visitors with the former's daughter, Mrs. Jim Frazer and husband at Langdon Alberta.

Mr. Hugh McLean, Misses Sadie and Gertie McLean, Messrs. Fred Metz, Sam McAllister, Bill Schaefer, Harold Thompson and Bill Wulawka were Sunday guests of Mr. and Mrs. N. Eckel.

The U.F.A. meeting at which Mr. P. J. Rock, of Morrin, was to have spoken on Monday evening, has been postponed till this Saturday afternoon at 2 o'clock in Lone Pine Hall. Ladies please bring lunch.

Mrs. Wm McCulloch, Mrs. H. and Mrs. H. J. Richardson and Mrs. N. Eckel were guests of the Seibertville W.I. at the home of Mrs. R. S. Kimmel last Thursday afternoon.

**Rugby Notes**

Rugby W.I. met at the home of Mrs. A. Hogg with an attendance of 24. Final arrangements were made for the Baby Clinic under the direction of Dr. Cody, which this branch is sponsoring at the home of Mrs. Wahl on Wednesday, June 16 at 1:30 p.m., open to all children of pre-school age. During the afternoon a lively discussion led by the Legislation convenor was carried on over certain items relating to that topic. A good report of the provincial convention was given by Mrs. Wahl. Two members, Mrs. Farrant and Mrs. H. Jackson, will go as delegates to the Farm Women's Week in Olds next month. Mrs. Parker was chosen as representative at the coming constituency conference. Members please take notice that, owing to the regular meeting day coming on Dominion Day, the next meeting will be held on Tuesday, June 29th, at the Hosegood home. Just before adjournment a humorous short story was given by Mrs. W. Brown, and a guitar solo by Colin Hogg.

**Melvin Notes.**

Don't forget the Dance at August Krebs' Barn, Friday night, June 11, in aid of the Go-Getters' Club.

Mr. and Mrs. Elmer Randa of Garfield spent Sunday with Mr. and Mrs. Emil Krebs.

We are pleased to hear that Mrs. Godfrey Carlson is gaining satisfactorily after her operation at the Holy Cross Hospital, Calgary.

Melvin Girls' ball team played a game with the Garfield Girls' team on Monday night at Garfield. The honors were won by the latter team.

Sunday guests of Mr. and Mrs. Peter Johnston were Mr. and Mrs. Ed. Vetter of Three Hills, Mr. and Mrs. Jess Ray and family, Howard Ray, Mr. and Mrs. Glen Johnston and family, and Laverne Gale, of Garfield. Mr. and Mrs. Hugh Morton of Didsbury and Miss Mildred Brown of Crossfield.

**Correspondence.**

Rock, Kansas.  
June 3rd, 1937.

Dear Editor:

Just a line to you and all friends of Didsbury. As we have now been away two weeks and have surely been having a most enjoyable time, so my mind wanders back to home and friends. Here is hoping everyone is in the best of health. We had a grand trip on our way down, not even a flat tire. As we came south from Calgary we came into the dust-torn country and a very pitiful sight. Dust was almost as deep as the fence posts, just a few inches sticking out. From Coult to Great Falls the fields and roadsides just like fall of the year, not a spear of grass, no cattle or stock of any kind to see; outbuildings and machinery covered with blown dirt.

Coming into Yellowstone Park for a day we saw some grand sights and found we could not get out of there only on the west, so had to go into Idaho and across Wyoming, putting us away out of our way, yet we saw a lot of country, but must say none half so nice as our own. The crops there were far ahead of anything we saw all the way down. Through Colorado, where they irrigate, saw nothing but alfalfa growing. No grain to speak of until we came close to Newton, Kansas, 100 miles or so from our old home, then the most beautiful fields of wheat one could ever wish to look at. And now some of the rivers have overflowed their banks and with so much rain, many of the fields have turned white and are ruined.

We are enjoying every minute of the time with relatives and friends, and had the joy of gathering in the little church of bygone days.

Now with best wishes to all and don't forget to keep smiling and looking on the bright side.

From Mrs. Jess Tuggle.

**IN MEMORIAM**

## WORLD HAPPENINGS BRIEFLY TOLD

Two naval airmen were killed when their plane crashed and sank in the Pacific ocean during the United States fleet's war games, naval officers reported.

The Girl Pat, Grimsby trawler whose adventures astonished the world last summer, has returned to Portsmouth from Georgetown, British Guiana.

William Spears, whose father was keeper of Flower Pot Island lighthouse in the Georgian bay for 25 years, has been named keeper to succeed him.

United States Labor Secretary Frances Perkins said that legislation to fix "minimum working conditions" tops the Roosevelt administration's labor program.

Proclaimed the "most beautiful milkmaid in the world" at a Sabetha, Kas., farm fair, Miss Aloha Warner seeks no greater glory. She declined a stage offer and a possible opportunity because she "is too busy delivering milk" for her father's dairy.

A despatch to the New York Times records the death in Italy of Hugh de Tenebroses Glazebrook, 82, noted portrait painter. He lived in Toronto for a while as a young man, and one of his paintings, "Lady in Black," hangs in the national gallery in Ottawa.

An increase of nearly 10,000 passenger car licenses sold in the first four months this year against the figures for 1936 was believed a sound indication of rising prosperity in Alberta, license department officials said. Sales totalled 54,300 up till May 1, 1937.

Colonel Mario Pezzi of Italy bettered the world altitude for planes by flying to an indicated height of 15,655 metres (51,361 feet). His mark exceeded the record of Squadron Leader F. R. D. Swain, of the British Royal Air Force, listed at 15,223 metres (49,944 feet).

The University of Manitoba chemists are working out a preparation that will kill dandelions without injuring grass. They reported dandelions on Manitoba's legislative grounds lawns may be in for a short life this spring. The new method of killing them has not been revealed.

### More Like Printing Press

Typewriter Used By Japanese Stenographer Has 3,500 Keys

Typists, whether they use the "hit and miss" system or are graduates of a special "pound the key" course, often feel that typing is one of the most strenuous jobs extant. But if they think they are overworked they should call on Kathleen Tsuchiya at the Japanese Chamber of Commerce in San Francisco. Imagine a typewriter with 3,500 keys. That's what Kathleen works on when she is doing Japanese letters. She "hunts and pecks" over this number of separate ideographs of a Japanese typewriter to produce the string of hieroglyphics which make up a Japanese letter. An unnamed Oriental genius invented the machine and fitted 3,500 pieces of metal type into pigeon holes and devised an arm that lifts each one up and impresses it upon letter paper. The funny part about the story is that when it arrived from Japan, puzzled customs officers finally classified it as a printing press. There are six Japanese typists in San Francisco but California-born Miss Tsuchiya is the only one who writes both English and Japanese.—St. Thomas Times-Journal.

### An Unusual Record

Italian Town Has No Births Or Deaths For Three Years

For three years there have been no deaths among the 400 people of San Gottardo, Italy, and several of the men and women are over 100 years old. I have almost forgotten how to recite the funeral service," said the decrepit village priest to the visiting bishop. There also have been no births in San Gottardo in the three years.

If it were not for the sun's attractions, Jupiter would, because of its size, kidnap the other planets and add them to the flock of nine moons which already circle about it.

## The World's Wheat Field

Occupies Only About One Per Cent. Of The Total Land In The World

How large is the world's wheat field? The food research bureau of Stanford University gives some interesting statistics. The world has about 400,000,000 acres under wheat, which is about twice the acreage devoted to maize or to rice, the grains that come next in importance.

The world's wheat field occupies about one per cent. of the total land in the world, about six per cent. of the potential arable and pasture land, about 11 per cent. of all land suitable for wheat cultivation and about 17 per cent. of the arable land now being utilized.

While wheat is grown both north and south of the equator, about 90 per cent. of the world's wheat acreage lies in the northern hemisphere. Asia alone contains more than a third of the world's wheat acreage, Europe a little less than a third, North America less than a quarter.

The country with the largest wheat acreage is Russia, 78,400,000 acres. The British Empire has 72,300,000, Canada's share being under 30,000,000 acres. The United States has 65,300,000 acres, China 49,100,000 acres, the French Empire 22,400,000 acres and the Italian Empire 12,000,000 acres.

## The Average Driver

Displays Certain Minor Failings When In A Hurry

The average motorist, according to a spokesman for the Harvard University bureau for street traffic research, has good intentions, is fairly skilful and is, on the whole, a safe driver. Then why are thousands on this continent dying in traffic accidents and hundreds of thousands of others being injured every year? The average driver who is, on the whole, a safe driver can not be exempt from responsibility.

The Harvard bureau spokesman places responsibility squarely upon that driver. He does get into accidents. Why? Not because he is unskilled or habitually reckless. He gets into accidents and becomes involved in slaughter because "he has certain minor failings which assume major importance when he is in a hurry." It is the duty of the average driver, therefore, to face his minor failings squarely and see to it that they do not become dominant in emergencies and make him responsible for manslaughter and serious property damage.—Galt Reporter.

## Evidently Not On Diet

Last Hawaiian King Was Served Heavy Coronation Dinner

The original menu for the coronation of Kalakaua, the last king of Hawaii, which has just been discovered, indicates he was not on a diet.

The official dinner was in the Iolani Palace, now the territorial governor's office. The menu included three soups, six varieties of fish, in addition to crabs and lobsters, seven kinds of roasted meat, two curries, potatoes, peas, corn, spinach, seven wines, six desserts fruit, liquor and beer.

Hiawatha, immortalized in Longfellow's poem, was a real Mohawk Indian.

Daimler is said to have built the first V-type engine in 1888.

## SOLVE YOUR "NEW FROCK" PROBLEM MAKE A DASH-ING SHIRTWAISTER

By Anne Adams

Want to look cool and crisp when the sun is shining just a shade too brightly? The answer to that question is Pattern 4413—your favorite shirtwaister that takes you everywhere and keeps you looking your best at all times! The tailored-look that's a classic part of this popular style is ever so easily achieved even by "beginners", for this smart pattern is one of the simplest to cut and stitch! Anne Adams knows that pertly slashed sleeves, notched collar, and interesting button-front are becoming to everyone and in good taste on sporting occasions, or afternoons spent at home. You've wide choice of fabrics for this diverting frock, among them vivid, printed percale, seersucker, or crisp linen.

Pattern 4413 is available in sizes 14, 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42 and 44. Size 16 takes 3½ yards 36 inch fabric. Illustrated step-by-step sewing instructions included.

Send twenty cents (20c) in coin or stamps (coin preferred) for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number, and send order to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

## A Lucky Purchase

Diamonds Worth \$15,000 Found In Auction Room Bureau

The old bureau in the auction room was rather attractive. A woman at Geelong in Australia thought it would look well in one of her rooms, and so made a bid for it, buying it for \$35. When it reached her house she began dusting it, opening the drawers, and peeping in the cupboards. To her amazement she touched a secret spring, came upon a hidden drawer, and found a little bundle of sheep's wool. Inside were diamonds worth \$15,000.

Tuberculosis of the spine has been noted in human skeletons more than 10,000 years old.

Motion picture films made in Japan in the last year numbered 496.

## Heredity And Intelligence

Investigation Finds That There Is Very Little Connection

Dr. Donald Snygg, of the University of Toronto, said that there is apparently little relation between heredity and intelligence.

Reporting on a study of 312 children placed in foster homes by the Toronto infants' home and their mothers, he told the Mid-Western Psychological Association:

"Results of the study offer little comfort to those who insist the intelligence of a child is unalterably fixed by its heredity. There is every indication that the effect of heredity upon the intelligence quotient is much less than many have supposed."

His survey covered the infants' homes records over a period of about eight years. Only those children whose mothers' intelligence rating had been established were considered.

Dr. Snygg said the best showing was by children whose mothers were in the average intelligence group—with mental ratings of 10 to 13 years of age.

The 77 mothers in that category produced 17 children whose "I.Q." was in the superior class, a number equalling that of both the other groups.

"While definitely subnormal mothers had a slightly higher percentage of dull children," Dr. Snygg said. "The majority of their children had normal intelligence and the percentage of superior children compared with that of other mothers."

"There appears to be some correlation between the intelligence quotient of mothers and of their children who have been reared in foster homes, but the relationship is so slight that knowledge of a mother's intelligence quotient is of very little value in predicting the intelligence quotient of her child."

## Helium Gas

Most Of The World's Supply Is Refined In Texas

Most of the world's helium supply is refined from natural gases at a United States government plant seven and one-half miles west of Amarillo, Texas.

Only slightly heavier than hydrogen, lightest of all chemical elements, helium penetrates gas bags far less rapidly than hydrogen. This, and the fact that it is non-explosive, makes it a prize sought after by many foreign governments, especially Germany, whose hydrogen-filled dirigible Hindenburg crashed in flames.

Helium was first discovered in 1868 when scientists noted it as a pale yellow band in the spectrum of the sun after a 27-year search. Helium was isolated from Texas gases, and to-day the Amarillo plant has a capacity of 20,000,000 cubic feet a year.

In 1918 the gas cost \$2,500 per cubic foot. Now it is being made for two-fifths cent a cubic foot.

Other deposits of helium are found in Canada, which produces about 5,000,000 cubic feet annually, and in Kansas.

The Shell-Mex House, London office building, contains 1,486 windows, 365 steel doors, 700 wooden doors and more than 20 miles of hot and cold water pipes. Its elevators can carry 10,000 persons in an hour.

News by radio can't take the place of a newspaper. You can't hunt it up later to settle an argument.

## Gardening

Several sowings of each vegetable are advised, otherwise all mature at the same time, and then there will be a feast of a famine. After all, with such things as radish, spinach, peas, corn or practically anything else for that matter, the time they are really worth eating is when they are fresh; that is, just mature.

Those who know all about the art of good gardening, advocate as a good, safe rule covering the seed to a depth equal to about three times the diameter. Now the beginner is not advised to procure a pair of callipers and work out the diameter of the great variety of seeds he or she hopes to plant. This is a rough rule only. With tiny seed like that of the poppy or the onion, seed about the size of a grain of sugar, merely pressing into the soil will be sufficient. With large things like gladioli and dahlia bulbs or potatoes, this rule will call for depth of several inches. With peas, beans and corn it will mean about an inch.

Too much stress can hardly be laid on the necessity of thinning. After the plants come up, one is urged to stop and consider just how big these are going to be in a few weeks. It may be only six inches, in which case the plants should need only to be spaced a few inches apart. But suppose it is the cosmos or the larger type of zinnias or marigolds that are being considered. These will reach from 18 inches to four feet when fully grown. Such things require much room on all sides if symmetrical and sturdy plants that will be both beautiful and storm resisting, are to be the result. Crowded plants will invariably be spindly and weak in the stem. Experts advise allowing about half as much space between as the plant will be high, whether it be vegetable, flower or shrub.

## Mystery Of Stonehenge

Prevailing Theory Is Wrong According To A French Scientist

When Stone Age man and his wife in Britain went to worship at the famed place called Stonehenge, they may have had comfortable seats indoors. In other words, the great stone circle of ruins, now one of England's prize mysteries, may once have been a covered temple.

Visitors at Stonehenge gaze up at the sixteen-foot stones that outline a great circle. They point out the inner circle and horseshoe of stones, and the altar-like arrangement of stones within. In their minds, they conjure up a picture of Stone Age Britons gathering in the open air by moonlight or at sunrise for strange, barbaric rites of worship.

But that prevailing picture is wrong, according to a theory advanced by Prof. A. Vayson de Pradenne of the University of Paris, in the British archaeological journal Antiquity. The prehistoric builders constructed a roof and walls of massive beams and earthen plaster over the stonework skeleton, he believes. To see what the building was like, we have only to look at a North American Indian earth lodge, in the Great Plains region.—Victoria Times.

## Recalls Old Mystery

Widow Of First Mate On Phantom Ship Is Dead

Mrs. Frances N. Richardson, 91, widow of the first mate on "the phantom ship" the Marie Celeste, whose crew vanished on the high seas in 1873, died recently in New York—the mystery of her husband's fate still unsolved.

As a bride, Mrs. Richardson stood down on the dock and waved goodbye to her husband, Albert, and the crew as the Marie Celeste sailed for Genoa from New York harbor with a cargo of alcohol in casks.

She never saw her husband again. The British bark, Dei Gratia, found the Marie Celeste floating on the ocean off the Azores Dec. 4, 1873, nearly a month after she sailed—no man aboard.

The cargo was undisturbed, there were no signs of disorder, and food had been prepared for the next meal. The gold watch of the skipper, Capt. B. S. Briggs, hung on its chain beside his empty berth.

## Just A Circular Room

A planetarium is a circular room over which is suspended a stainless steel dome serving as a screen upon which, by means of an intricate projector, it is possible to show in a realistic manner every star or other object in the sky that is visible to the naked eye.

There are 1,024,600 persons by the name of Johnson in the United States.

## RURAL QUEBEC

The above sketch is from the pen of Dr. Vernier Rondeau, dental surgeon of Rouleau, Sask. It depicts a rural scene common in the province of Quebec where the doctor spent his childhood.

**THIS BACKACHE IS AGONY!**

**KIDNEYS WILL CAUSE IT!**

Sluggish kidneys let poisons accumulate in your system. Lame back, lumbago and rheumatic pains often follow. GIN PILLS will give the kidneys the help they need to filter out the poisons that cause the pain. "Prove their merit through their use!"

## THE YELLOW BRIAR

A Story of the Irish on the Canadian Countryside

By PATRICK SLATER

By arrangement with Thomas Allen, Publisher, Toronto.

CHAPTER V.—(Continued)

Up at Bradford and Cookstown, where he had worked three years for the Stoddarts, the family had been worldly Episcopians, who thought themselves some snuff. You understand? They had pewter and flatware, and none but the help ate in the kitchen. Such landed gentry kept a hired man in his place. And the other young people in the district were also sinfully-minded, and indulged in dancing and card playing, which were abominations to the godly discipline of the Methodist Connexion. The result was that young Marshall withdrew himself from such temptations of the flesh, and had spent his evenings reading the Bible and reflecting on The Commentary and Critical Notes by Adam Clarke, LL.D., F.S.A., etc.

So prospects did not look any too bright for finding a wife for William. But finally so happy a thought occurred to Mrs. Marshall that her fingers hesitated for a moment in their ceaseless knitting.

"Willie," said his mother, as she ran a knitting needle through her hair, "you might do worse than go down to Toronto and ask for John Trueman's Nancy!"

Mrs. Marshall's maiden name was Cohain; and she was a distant connection of Sarah Trueman. The son felt a religious impediment to marrying a tavern keeper's daughter, and into the Established Church.

"Aye," advised his father, sagely, "Aye, my son, to get the right kind of a wife, go to a house that has a good mother."

So having tidied himself up to look respectable, young William drove off down Yonge Street with his father's team, and arrived on Saturday morning at the Tavern Tyrone. The great, rough lump of a man was warmly welcomed by Mrs. Trueman, who thanked his mother kindly for the nice firkin of butter. Young Marshall wore a suit of dark-colored homespun, heavy cowhide boots and a shabby, broad-brimmed, grey felt hat, which he had borrowed for the occasion.

Of course, he would be stopping for dinner. Yes, and he might be lodging over Sunday. Himself and the young man adjourned to the tap room, and fell into the heavy labored conversation of two males, related by marriage, who are anxious to seem friendly to one another, but are racking their brains to talk about something in common.

"It's hoarse you are, Willie," Mr. Trueman remarked, after the weather had been talked out. "I'm thinking you've got what is called a

Methodist cold." And he winked his far-off eye.

"Well, sir," said William, in his slow, deliberate way, "I am an adherent of the Wesleyan Connexion, but I never heard tell of that sort of a cold."

"Ha! Ha!" explained Himself, with his chuckle, "that's the hoarseness the saddle-bag itinerants get with their roaring and noisy preaching."

In John Trueman's opinion, the Methodists were worse than the black-mouthed Presbyterians.

A long pause followed that thrust. "So they tell me, Willie," Mr. Trueman resumed, after a patron had slipped in to wet his whistle with a touch of bitters, "that you have taken up a farm in King Township."

"No, sir," William replied, "but I have started to break a farm in Mono Township, back up over Sligo Hill."

"Ah! yes, indeed! And have you a house built, William?"

"My brother Maxwell helped me take off a little crop this summer; and we have just finished putting up a small log house."

Himself considered the matter.

"I suppose, Willie," he suggested, after reflecting, "you will be looking for a wife next?"

"Well, now, Mr. Trueman," the young man replied promptly in his throaty voice, "that is what brought me to Toronto. I thought perhaps I might ask for one of your daughters."

Himself smiled slyly, as he tossed his beard up.

"Oh ho!" said father, "it's to the girls' mother you'll have to be speaking about that, Willie."

"I shall perhaps have occasion to do so this afternoon, sir," replied the serious-minded young man; and he slipped off down to King Street to buy a copy of "The Life of Wesley", by Coke and Moore.

Ah, what a lively commotion then arose in the Trueman household! The eldest daughter, Nancy, was a girl of seventeen, and a buxom, hearty young thing she was, blooming out into womanhood. Himself had recently caught Miss Nancy stepping out with a soldier man from the fort. It is that way, always, in a garrison town:

Around the corner, beneath a tree, The Sergeant Major made love to me. He kissed me once! he kissed me twice! It wasn't the proper thing to do, But oh! it was so nice.

Himself had dusted the young lady's back smartly, after the approved fashion of irate Irish fathers. Such a job had he made of it that the mother had been salving the welts on Nancy's back for days afterward. And for a week's time, now, Miss Nancy Trueman had been confined strictly within the limits of her father's premises.

No sooner had William Marshall stepped out the door than the wife and daughter were called to a hasty conference in the sitting-room of the Tavern Tyrone. Himself informed them that Nancy would straightaway marry the decent, respectable young man, and go up-country with her husband.

"But, John, dear," his wife cautioned him, "the young man has not even looked at the girl yet!"

"She's too good looking, damn it," declared John, "for a tavern keeper's daughter on Queen Street."

To be treated like a chattel, thus; and thrown into a young man's arms as from an auction block was altogether too much for Nancy's nerves. Her temper dissolved in a flood of angry tears.

"Bu-hugh!" bawled the girl, struggling for breath, "and I've never seen the clod-hopper myself!"

"Now, my love, treat the young man real graciously," urged the mother. "You might like him, after all . . . if he'll have you."

There was roast beef and Yorkshire pudding for dinner that day at the Tavern Tyrone, and Miss Nancy was a sweet, demure young thing. She was wearing Mamma's gold locket and chain. So William had occasion to speak to Mrs. Trueman privately. And the good woman was greatly surprised—of course.

She thought the girl was very young, but then, of course, yes, of course! Nancy should consider the matter.

So Miss Nancy stepped out that afternoon to show William the sights of the town. Poor William, prouder was he nor ten peacocks! To his

**for BRUISES**

**MINARD'S "KING OF PAIN" LINIMENT**

simple fancy her cheeks had a bloom as fresh as the apple. The wife-hunting country boy was fair bewitched; and from the secret places in his heart that had never been tapped before, he poured out on the young girl's ears all his hopes and fears of things present and to come, how little gear he had, how much he loved her, and how much he needed her. Nancy felt sorry for the simple, awkward, honest, hard-working boy.

As they strolled up Bay Street, past Doel's brewery, she took his calloused hand, and turned facing him squarely.

"Of course, William," she told him, "I know you would be kind and good to me; but a woman needs a little time to think things over. Now, I'm going to slip back home . . . alone. Don't you come in till supper time! . . . and when you do come in . . . look dejected like, and don't mind if I'll not be speaking to you."

On arriving home, Miss Nancy bolted upstairs in a bound, and slammed the bedroom door. Himself and the wife hurried up after her to see what the matter was. The girl was sprawled on the bed with her face buried in a pillow. She was sobbing in noisy spasms, and carrying on most distressfully.

"Oh! Mama!" she sobbed, "you'll not let them marry me off to a poor, clumsy farmer, will you?"

" . . . And send me to live in a hut in the bush!"

"And no furniture," she wailed, "and only one room in the shanty!"

"But, Nancy dear," urged her distressed mother, "think of all the bedding and linen you have trunked that you can take with you . . . yes, and the tableware . . . the drawn linen tablecloths . . . and . . ."

"And no bed to put them on!" bawled Nancy, ". . . and no table for the tablecloths!"

"Hur-umph! Hur-umph!" expostulated Himself, tossing his beard, "I'll have you know, young woman, that John Trueman will supply his daughter, on her marriage, with suitable household furniture complete!"

And downstairs the good man stormed in high dudgeon.

Mrs. Trueman stayed to calm her daughter, who was sobbing and grunting into her pillow in a noisy way. There was a speedy lull in the tempest, followed by a complete silence. Then Miss Nancy looked up from her bed of sorrow with a saucy glint in her eyes.

"Do you think, Mother dear,"—and Nancy's voice was always clear and low—"I could get that husband of yours to throw in a couple of cows . . . ?"

And, of course, Nancy Trueman was truly and sincerely in love. A woman, as you know, does not have to fall in love. By one of the inexplicable laws of her being, a woman is always in love, and is as full of love as a nut is full of meat. A man must find a tangible object for them before his affections are aroused; but a woman's love can flourish and abound in a dreamland all her own. It is as much a matter of chance that her affections settle upon a particular man as that swarming bees cluster on a particular limb of a tree. It is not the limb that causes the swarm, nor the man that makes a woman love.

So John Trueman felt young Marshall was a veritable godsend; and that it was his fatherly duty to subdue his daughter Nancy's will to a like way of thinking. And he was a steadfast-minded man, who stood firm and set in his purposes. The girl kept her chamber that Saturday afternoon and evening. Himself gave strict orders that if she abide there it be on an empty stomach. The mother kept a silent counsel, and moved quietly about the house, as subdued and repressed as any dutiful wife. William Marshall came in at supper time to be told that Miss Nancy had a bad headache; and, quite casually by Himself, that such

a complaint was a rare occurrence in the Trueman family.

On Sunday morning the Trueman sat down with considerable dignity to the family breakfast table. Miss Nancy was there, looking a trifle pale, but her appetite was in good condition.

(To Be Continued)

### Russian Watch Industry

**Soviets Believe Many People Would Buy Cheap Type**

Soviet Russia believes that all of Asia and a good deal of Europe will buy watches if a cheap type of watch can be brought within their reach. The first stage in the Soviet watch industry of the future is to be a factory at Samara on the Volga, where 10,000 workers are expected to be employed. To try their hands at training the Russians, thirty Swiss watchmakers and their families have just reached Samara from Le Locle and La Chaux de Fonds, the main watchmaking centres in the canton of Neuchatel.

In these mountain towns, tucked away in one of the Jura valleys, watchmaking is a family trade handed down from generation to generation by the watchmakers' schools. Both Le Locle and La Chaux de Fonds have suffered severely from the slump, and even the change-over of some of the factories to the manufacture of wireless sets has failed to absorb the unemployed. Now that thirty skilled men have left to start the Russian watch industry, others are preparing to follow.—New York Times.

### The Cinque Ports

**Lord Willington, Former Governor-General Of Canada, Is Lord Warden**

Lord Willington, former governor-general of Canada and viceroy of India, was present at the Coronation both by reason of his rank and as being lord warden of the Cinque Ports, an office he has held since his return from India last year.

The Cinque (Five) Ports were originally Dover, Sandwich, Hastings, Romney and Hythe, and their origin probably goes back to Roman times. William the Conqueror appointed a warden to have jurisdiction—civil, military and naval—over the whole of this area, which was charged with the duty of providing shipping for the state. Nowadays the lord warden still exercises a certain maritime jurisdiction, and has a residence in Walmer Castle and the office is considered one of considerable dignity.

The late Marquis of Reading held it prior to Lord Willington.

The machine gun first was patented in 1862 by R. J. Gatling, Indianapolis, Ind.

### HAVE YOU Stomach Upsets?

If you are troubled with indigestion, gas, sour stomach, heartburn, if you are weak and lack appetite, try Dr. Pierce's Golden Medical Discovery now. It stimulates the appetite, improves the action of the stomach,

makes the food digest better. Read what Mrs. Doris Berrie of 150 Rebecca St., East, Hamilton, Ont., said: "After an illness I felt very weak, had no appetite and suffered from indigestion. After eating I would get so bloated and frequently had heartburn. I used Dr. Pierce's Golden Medical Discovery and it was wonderful. It improved my appetite and helped to drive away the stomach discomfort. It seemed to build me right up." New size, tabs, 50c. Liquid \$1.00.

### Little Helps For This Week

Set a watch O Lord before my mouth; keep the door of my lips. Psalm 141:3.

What, never speak one evil word, Or rash, or idle, or unkind; O how shall I most gracious Lord, This mark of true perfection find?

When we remember our temptations to give way to disappointment or irritation, and how hard a thing it is from day to day to meet our fellow-men, our neighbors, or even those of our own household without showing signs of impatience, with only kindly feeling finding expression and ungenial feeling, inwardly at least, kept imprisoned, then we shall be ready to acknowledge that the man who has attained mastery of himself under all circumstances is fashioned upon the style of the Perfect Man.

### Takes Four Lines Of Traffic

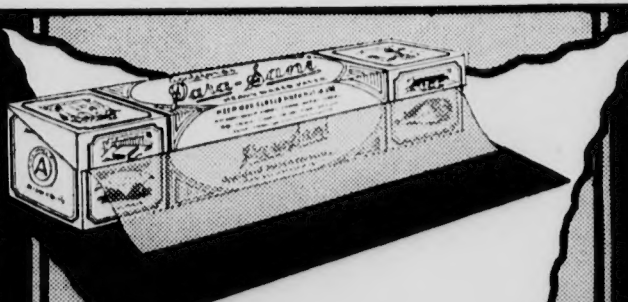

**New Chelsea Bridge Opened By Canada's Prime Minister**

Completed four months ahead of schedule, the new bridge at Chelsea, England, was opened by Prime Minister Mackenzie King, May 6.

The \$1,835,000 bridge and approaches were started in October, 1934. The bridge is 698 feet long, the centre span being 332 feet and the two side spans 135 feet.

Old Chelsea bridge, opened in 1858, looked nice in pictures in the Royal academy, but there were endless controversies about its safety. After various efforts to strengthen it, a load limit of five tons was imposed. It was only wide enough for two lines of vehicles while the new bridge will take four lines of heavy lorries if necessary.

A film of oil from passing liners extends out over the ocean for 500 miles from both New York and Cherbourg. The oil is so thick in some areas that birds have become stuck in it. 2203

### How To Overcome Piles And Rectal Soreness

If you are annoyed with itching piles or rectal soreness, do not neglect the same or run the risk of an operation. Any itching, soreness or painful passage of stool, is nature's warning and proper treatment should be secured at once. For this purpose get from any druggist, a package of Hemoroid and use as directed. This formula, which is used internally, quickly relieves the itching and soreness and aids in healing the sore, tender spots. Hemoroid is a physician's prescription and is highly recommended. It is easy to use and it seems the height of folly for anyone to risk an operation when a simple remedy, which is so pleasant to use may be had at such a reasonable cost.

**THE CHRISTIAN SCIENCE MONITOR**

A Daily Newspaper for the Home

It gives all the constructive world news but does not exploit crime and scandal. Has interesting feature pages for all the family on Women's Activities, Homemaking, Gardens, Education and Books. Also pages for the Children and Young Folks. Vigorous editorials and an interpretation of news in the "March of the Nations" Column are of special interest to men.

## LOCAL & GENERAL

Mr. J. A. McGhee attended the Grand Chapter of the Eastern Star on Thursday.

Mr. L. J. Kalbfleisch of Three Hills was visiting relatives and friends in town Monday.

The I.O.D.E. conducted their annual violet tag day on Saturday. The proceeds amounted to \$18.36.

Mr. Otto Mueller, of Ghost Pine, is visiting his sister, Mrs. Bert Fisher, this week.

We have men's all-leather Work Shoes from \$2.50 up.—T. E. Scott.

5-Room House For Sale. In good condition and price reasonable.—J. Scrutton, photographer.

Mr. and Mrs. Lester Stauffer and Mrs. Emerson Shantz spent last week visiting with Mrs. Stauffer's and Mrs. Shantz' parents at Galahad.

At the Opera House this weekend "The General Died at Dawn," featuring Gary Cooper and Madeleine Carroll in a story of Chinese war lords conniving for power.

A. Melville Anderson, Optometrist and Sight Specialist, will make his regular visit to the Rosebud Hotel on Monday, June 14th. Eyes examined and glasses fitted.

An Old Time Barn Dance to be held on Friday June 18th in Bill Brown's Barn in aid of Rugby Community Hall. Good Music, Good Floor and Good Refreshments.

Howard Halliday returned from the east with his new car on Sunday. While away he visited friends and relatives in Toronto, Chicago and St. Paul.

Mr. H. Morgan, local postmaster, is in Lethbridge this week attending the convention of the Alberta Postmasters' Association. Mr. Morgan is president of the association.

Boyd Cressman, who spent the winter at the coast, is visiting the Allen Hunsperger family and other relatives while en route to his home at Kitchener, Ont.

Weekend Special at T. E. Scott's—Men's Dress Shirts, regular \$1.00 line to clear at 75c.

The Mountain View Social Credit Group will hold a pie social and program at Community Hall this Friday evening, June 11th, at 8.30. A speaker will be present.

The postponed meeting of the Didsbury U.F.A. will be held in Lone Pine Hall on Saturday afternoon, June 12, 2 o'clock. Didsbury U.F.A. members and friends please take note.

Harry Gabel, who had his foot amputated at the Calgary General Hospital about a month ago returned to Didsbury on Thursday and is now at the hospital here. We are pleased to report that he is progressing nicely.

Buy your Summer Underwear from T. E. Scott and save money.

J. Kirby will represent the King Hiram Masonic Lodge at the Grand Lodge of Alberta held at Calgary this week. Dr. H. C. Liesemer will also attend in his capacity as grand organist. Several other members of the local lodge will attend the meetings of the grand lodge.

The 20th Century Club meeting Tuesday, June 15th, will be an Outdoor Party arranged by Messrs. Bob Eubank, H. Stackhouse and Lennie Berscht. Members are requested to meet at the club rooms early and to bring cups. The club does not wish to conflict with school work and since exams commence the following morning, high school students will not be expected at the meet. This arrangement will, no doubt, be appreciated by the teachers.

The St. Hilda's Chapter of the Eastern Star was honored at the Grand Chapter held in Calgary last week, when one of its members, Mrs. J. A. McGhee, was elected grand associate conductress of the Alberta Grand Chapter. The local chapter was well represented when Mrs. A. C. Fisher, as delegate, Mrs. McGhee, as grand officer, Mrs. Ray Lantz and Mr. Stewart Tighe attended the sessions. Mesdames Morgan, Evans, Phillipson, and Edwards also motored to Calgary to attend an evening meeting on Thursday.

## LOCAL & GENERAL

Try a pair of our \$1.45 Rider Pants—T. E. Scott.

Mr. A. Snyder, of Kitchener, Ont. will spend the summer with his son Mr. Wilfred Snyder and family.

Attention, Farmers! Sacks suitable for wool or brome seed.—See J. Kirby.

A meeting of the directors of the Didsbury Agricultural Society will be held in C. E. Reiber's office at 2 p.m. Thursday, June 17th.

Jean Lamont entertained a number of her young friends on the occasion of her eighth birthday last Wednesday, when a very enjoyable time was had by all.

Watch for particulars of the Calf Club dance at Mr. Norman Clarke's barn on Friday evening June 18

## NOTICE

Complaints have been received that cattle are being allowed to run at large and are being picketed in different parts of town.

Grazing or picketing stock on the roadside, lanes, or public property, is prohibited by the town by-laws. Such stock are liable to be impounded.

## Clovermount Girls Win Tournament

The girls softball tournament held at Westcott on Saturday afternoon saw six teams entered, and Clovermount Maple Leafs proved to be the winners after three close games.

They beat Crossfield Girls 21-20 in the first game and took their game with Melvin 15-7 and the final game from Garfield 7-5.

Complete inquiry into the road-building operations of the provincial public works department and the circumstances surrounding reported purchase of costly machinery for roadmaking, despite the fact that departmental estimates have not yet been approved, will be sought by J. J. Bowlen, Liberal leader.

Hon. W. A. Fallow will be asked to reply to the charges that Alberta road construction costs are the highest in the history of the province and that road maintenance costs are unduly high, despite the poor condition of the main highways.
